Peter MacDonald	Confidential Claim Retracted
Chairman	
Navajo	Mr. Harry Early Authorized by:
Wilfred Scott	
Vice-Chairman — — Nez-Perce	Pueblo of Laguna Council Date: 4/35/13
Leonard Atole Secretary	Box 194
Jicanila Apache	Old Laguna, NM 87026
Allen Rowland	
Tressurer	Dear Governor Early:
Northern Cheyenne	Total Contract Belly:
Leonard Burch	Places find analysis at a latter to terror to
Executive Member	Please find enclosed a draft of a letter to Anaconda regarding
Southern Ute	reclamation. This letter is intended to open up a dialogue with
Forest Horn	- Anaconda and ARCO on:
Executive Member	
Crow	 the urgency of moving the reclamation program forward
Judy Pinnecoose	
Executive Member	• the use of the reclamation program to help solve the
Ute Mountain	employment problem, and
	employment problem, and
Board Members:	
Acoma Pueblo	the potential for the Pueblo to convert the reclamation
Blackfeet	program into viable enterprises.
Chevenne River Sioux	
Chippewa-Cree	Someone from the CERT staff who has been working on Laguna projects
Colville	would be available to meet with you, any staff members you designate,
Fort Belknap	and your attorneys at your earliest convenience. After discussing
Fort Berthold	the letter and reaching agreement, we feel it is important to send
Fort-Hall	
Fort Peck	it out as soon as possible. By entering into a dialogue established
	before the reclamation plan is issued, the Pueblo may be able to
Jemez Pueblo	influence the content of the plan. If not, then at least a
Pueblo of Lagurea	mechanism for discussing the plan will have already been established.
Santa Ana Pueblo	
Spokane	I will call soon to find out when a meeting could be set up to
Uintah-Ouray	discuss the draft letter to Anaconda. I will see to it that one
Wind River	of our senior staff members will attend.
Yakıma	or our sental pigtt members All gifeng.
Zie	
	Very truly yours,
Executive Director:

DRAFT LETTER to Ralph Cox, President of Anaconda
from Governor Early, Pueblo of Laguna

The imminent shutdown of the Jackpile surface mining operations will cause hardship in many quarters. It will entail a loss of employment and wages for many workers and a loss of revenue for the Pueblo of Laguna. While recognizing these prospective losses, we also see this as a challenging opportunity for a collaborative effort to restore the mined-out area and to find new productive activities by which the Laguna workers and the Pueblo government can maintain their livelihood.

The recent decision by Anaconda to accelerate the phase-out of open pit

operations has greatly complicated the problem. It means that the

Laguna workers are scheduled to be laid off much sooner than expected

and before they or the Laguna leadership have had much opportunity to

explore alternative employment prospects. We are now moving ahead as

rapidly as possible, with cooperation from CERT and others, to investigate

such possibilities. However, other uranium operations in the area are

also shutting down, making the short-term prospects poor at best.

The other serious consequence of the accelerated phase out is that we do
not yet have an agreed upon reclamation program that could shift into
high gear and provide continuing employment for a substantial portion of
the workers released from the mining operations. Such work would understandably
be only for a few years, but it would give some critical time needed to
develop other, longer term employment possibilities. Also, if appropriately
conceived and managed, this work could incorporate a phased transition

of workers, managers, and equipment into Pueblo-owned or private enterprises that could carry on similar types of work in the surrounding area.

We understand that you are working on a revised reclamation plan and trust that it will be responsive to the environmental issues already raised in my June 9 letter. We also urge that the plan provide maximum employment opportunities for Laguna workers over the next few years.

Finally, we hope that the plan will be made available in the near future and that it will provide a basis for early agreement so that the work can proceed. If the plan is satisfactory, it might obviate the need for an environmental impact statement (EIS) that could further delay the work, cause more unemployment and increase the cost. If done poorly, reclamation will be a disaster for the Laguna people. It may also cause other tribes to question Anaconda's and ARCO's commitment to reclamation and environmental protection. If done properly, the phase out of the Jackpile mine could serve as a model for other mines and other tribes which will face this problem in the future.

While awaiting completion of the reclamation plan, it might prove helpful to both parties to discuss employment and other related aspects of reclamation and ways in which the reclamation process might facilitate the development of local enterprise. I look forward to hearing from you at the earliest possible date so we can move forward with the resolution of these issues.

cc: R. D. Lynn, General Manager, Jackpile Mine, (P.O. Box 638, Grants, NM)--do not include addresses in cc

Robert O. Anderson, Chairman of the Board, ARCO
